1. Course Overview	
Full course/award title(s)	BA (Hons) Art History
Course Code	UBAA_0003_FR
Fees	Please see the tuition fees on the Regent's University London website (https://www.regents.ac.uk/admissions/tuition-fees)
Location of study	Regent's Park
Off campus elements / locations	Not applicable
Awarding institution	Regent's University London
Course entry points	September 2023 / January 2024
Date of original validation / revalidation	November 2022
Validated until	September 2028
Framework for Higher Education Qualification level of final award	Level 6
Number of credits in award	360 credits
UCAS codes	BA (Hons) Art History A006 BA (Hons) Art History with Liberal Arts and Media Foundation A005
Relevant QAA subject benchmark statements	Quality Assurance Agency (QAA) benchmarking statements: History of Art, Architecture and Design December 2019
Other external and internal references	QAA Framework for Higher Education Qualifications (FHEQ) Regent's University London Academic Regulations Regent's Learning, Teaching and Assessment Strategy Regent's Learning Outcomes (RLOs) (2021) Regent's Assessment Framework (2022) Advance HE Principles of Inclusive Curriculum Design Regent's Learning Design Framework: RADAR (2020)

Professional, statutory or regulatory body recognition/accreditation	Not applicable
Mode of study (Full Time / Part Time)	Full Time
Language of study	English
Minimum / Maximum duration of course for each mode of study	<p>Part time: N/A</p> <p>Full time: Minimum - 4 years including the integrated foundation (level 3) 3 years without the integrated foundation (level 3)</p> <p>Maximum*- 6 years including the integrated foundation (level 3) 5 years without the integrated foundation (level 3)</p> <p>* In exceptional circumstances only – refer to Regent's University London Academic Regulations for details</p>
Date of production / revision of this course specification	November 2022

2. Why study this course, including course aims and objectives

The BA Art History is designed to appeal to students from a wide range of backgrounds, including those who have not previously studied art history. The degree combines first hand image and object analysis with research into why the image or object was produced, when, where and for whom. The curation and circulation of works of art are key themes that make the degree distinctive. There is a particular focus on the ways in which art has been and is displayed and interpreted whether in museums and galleries, printed material or digital formats. You will be offered various opportunities including curating an exhibition in the university's gallery space as well as going on a placement and support in developing your own entrepreneurial ideas. In addition to art history modules, you will take special electives from a wide range of cross-disciplinary topics and can learn a foreign language. In this way, your theoretical studies are complemented by experiences in the art world. You will be able to shape your own degree path along an academic route whilst engaging with industry and enterprise concerns.

First-hand, object-based study is fundamental to the degree. Based in central London, we make the most of the resources around us with visits to museums and galleries as well as heritage sites, auction houses, archives and private collections. Industry professionals regularly give guest lectures, enabling you to network with those working in the arts and heritage sectors, museums and galleries, curating and auction houses. Through a range of core modules, you will study concerns underlying the history of art, curating and art markets. You will be able to pursue your own interests in depth in presentations and written work. As the class sizes are small, you will benefit from close interaction with faculty as well as visiting experts in the field. You will be assigned a personal tutor to guide you through your degree, enhancing the very personal attention each Regent's student receives. Students come from a wide range of backgrounds which contributes to lively classroom debates and develops your cross-cultural understanding.

On this degree, you will develop skills that are of value to a range of careers including analytical and critical skills, writing skills, presentation skills and leadership skills. Our students seek careers in auction houses, museums and commercial galleries, entrepreneurial start-ups as well as academia and public institutions. You may seek a career in teaching, either in schools or in higher education. You may work in collection management or conservation, whether of images, objects or architectural environments such as heritage sites. Equally, you will benefit from the skills offered by the degree to develop careers in the wider visual fields of fashion, television, film or advertising.

3. Course structure

This is a guide to the overall structure of your course, mandatory elements, modules (noting the terms that they are completed), and periods of assessment.

We have designed our curriculum so that you can gain a deeply personalised education. The BA (Hons) Art History is built on the latest academic thinking, informed by in-house

research. You will expand your knowledge, skills, practice and thinking with three building blocks to make you a great practitioner:

Subject Core: This degree focuses on works of art in depth while addressing equally the contexts in which works are produced, disseminated and received, in relation to social, cultural, political and economic factors. The ways in which art has been written about are questioned, addressing how racial, cultural and gendered narratives shape our understanding of art. Modules focus on diverse media, geographical areas and time periods which are structured partly chronologically and partly thematically. Students explore historic as well as contemporary works of art in a wide range of contexts from museums, galleries, stately homes and auction houses to private collections and public spaces. The locations in which art is curated and encountered are examined while the ways in which art has circulated in the past and today are equally addressed.

Industry & Entrepreneurship: Each level of your study includes a learning component that enables you to discover and plan your professional goals:

- During the Spring Term of Level 4 (year 1) you will take the module “Exploring Industry and Entrepreneurship” in which you will explore the world of work in the art industry and its future with a view to informing your own potential career or entrepreneurial journey. You will be supported by experts in the Careers, Enterprise and Industry services and the university careers platform, Handshake.
- In the Spring Term of Level 5 (year 2), you will experience a real challenge from the world of work by choosing one of three modules. If you choose “Industry Challenge” you will collaboratively work on a live industry project so as to project manage, research and test concepts to address the challenge. In the “Enterprise Challenge” option, you will be guided to develop your own concepts, pitch your ideas to an external panel and create an entrepreneurial plan. Finally, you may choose the “Work Placement” module, where you will have the opportunity to acquire a range of work-based skills by taking an approved work placement.
- The Industry and Entrepreneurship learning you would have acquired in the previous two years of your studies is integrated into the final year (Level 6) Major Project. For your Major Project you will have the option to build and develop your unique idea into a full enterprise project or to engage in a more academic Major Project that has an element of Industry/professional application. For the BA Art History this includes the opportunity to curate an exhibition in the university’s gallery. This Project involves all aspects of staging an exhibition including working with artists, selecting the work, curating and hanging the exhibition as well as advertising it and organising the private view.

Special Electives: You will be able to choose from a range of electives that go beyond your core discipline and gain even more future-focused skills. The Special Electives take either a i) skills focus; ii) interdisciplinary focus; iii) or specialist subject focus and are designed to respond to your interests and emerging global trends. These are not tied to a specific discipline and are available to every

Undergraduate student in Regent's. They are designed to be relevant to the world we live and work in – now and in the future. In this way, you will consider your core subjects from new angles or add more value to your personal brand with a secondary discipline or language.

Languages are central to the university's identity and throughout your degree you will be able to choose to learn one of these: Arabic, Chinese, French, German, Italian, Japanese, Portuguese, Russian or Spanish. Language study enhances your personal and professional development. It enables you to understand and imagine new worlds and to communicate with others to build connections

At level 4 you will take two electives, one in each term. You can choose to study a language in both terms or take "London Perspectives" in Autumn and "Global Perspectives" in Spring.

London Perspectives will utilise London as a learning platform. Through a combination of on-campus activities and field trips to key venues, you will encounter contributions that the city and its people have made to a range of fields, including your own academic specialism. In Global Perspectives you will learn how to work collaboratively across contexts and cultures to improve the communities we are living in.

At Levels 5 and 6 you will take one Special elective plus one Language Elective (or a further Special Elective) in each term. Each term offers a choice of twenty special electives at each level (see table below course structure).

At Level 4 (Year 1), you will also take "Learning Perspectives", a common module for all undergraduate Regent's courses. This module will induct you to Regent's pedagogic approach. You will acquire discipline specific and interdisciplinary skills, knowledge and approaches to learning which you will apply during your university study and beyond.

Additionally, you have the option to study abroad in the second term of the second year of your degree (Level 5) at one of the University's international partner institutions. In this way you will immerse yourself into a new culture while expanding your knowledge and skills in your field.

Optional Integrated Foundation Year (Level 3 or Year 0)

The optional integrated Foundation year will prepare you for degree-level study, introducing the basics of your destination degree area and a range of key skills and exciting topics that will serve as an introduction to the unique Regent's degree model.

While your subject modules will be with students heading towards the same or related degree programmes, the skills and topics modules will include students preparing for a variety of degree programmes enabling you to mix, learn and co-operate with peers who will bring a range of different perspectives, knowledge and approaches to the classroom and beyond. Through that experience you will be able to bring that broader understanding back into the learning in your subject modules, in the same way as you will experience the

interaction between your subject cores, Special Electives and Industry & Entrepreneurship modules at degree level.

In your first term you will take a core module related to your destination degree for 20 credits alongside four shared modules covering key skills and knowledge each worth 10 credits. This core module introduces you to 'Liberal Arts and Media' including classes on key concepts and thinkers as well as discussions on global issues from various perspectives. The shared modules cover 'Writing for Success', 'Critical Thinking', 'Cultural Understanding' and 'Politics, Society and Citizenship'.

In your second term you will again take a core module related to your destination degree alongside four shared modules covering key skills and knowledge each worth 10 credits. The core module extends your understanding of 'Liberal Arts and Media' by exploring more contemporary topics including performance, film and media production. The shared modules for Term 2 are 'Communications', 'Creativity and Entrepreneurship', 'Cultural Industries' and 'Making Use of Data'.

Level 3 will provide a rich student experience to ensure that you begin your degree at Level 4 confidently able to get the most out of our unique degree experience.

The academic year for the course follows the regular university undergraduate calendar (<https://www.regents.ac.uk/admissions/academic-calendars>):

- Autumn Term: September to December.
- Spring Term January to May.

If you are a January starter on Foundation (level 3), you will be able to complete your foundation year in six months by taking a summer term in order to complete the Foundation year by the end of July. This will allow you to start your second year of your study (the first year of your degree) in September.

Classes take place from Monday to Friday, typically between 09:00 and 19:00.

Assessments are scheduled throughout the academic year. Submission dates can be found on the Blackboard page of the module and the assessment brief.

If you choose to study abroad, you will do so in the Spring Term of Level 5. Some destinations have term times that differ from Regent's University London and may start as late as March and end as late as June.

Work Placements normally take place in the Spring Term of Level 5, although might be scheduled in the summer holiday.

Modules

Your course is composed of a number of modules that each have a credit value. On successfully passing each of these modules, you will gain credits that count towards the total needed for your degree.

One credit equates to 10 notional hours, which is the average time a student will take to achieve the specified learning outcomes. So if a module is worth 10 credits, then you would expect to spend 100 hours studying this. These will not all be 'taught' hours. You will receive guidance and instruction through workshops, seminars, lectures, etc, but you will also need to engage in self-study. A percentage breakdown of teaching contact hours and self-study required on this course is indicated in section 6.

On an undergraduate degree course, you can usually expect to study 120 credit per level (or year), with no more than 80 credits per term.

Course modules - Level 3/4/5/6 (Year 0, 1, 2, 3)

Course Structure Level 3/Year 0

Term	Common Modules	Credits
Autumn/Spring	FND301, Critical Thinking	10
Autumn/Spring	FND302, Cultural Understanding	10

4. Exit awards

For UG refer to section E9 of the Academic Regulations

5. Learning outcomes

This is a guide to the more specific knowledge and skills you will gain if you take full advantage of the learning opportunities available to you.

Learning outcomes will tell you what we expect you to know and/or be able to do once you have completed a learning process (i.e. a module, a level or the entire course) (QAA, 2018). Teaching and assessments are designed accordingly to enable you to demonstrate that you have adequately met these outcomes.

The learning outcomes that you will be expected to demonstrate at the completion of each level of your studies are listed below. Each module that you will study has developed 2-4 distinctive Module Learning Outcomes (MLOs). Each MLO is mapped against an equivalent Regent's Learning Outcome from the list below. We have ensured that at each level all the compulsory elements of your course assess in their totality all ten learning outcomes (see section 16).

LEVEL 3 OUTCOMES	
RLO1 Collaboration	Determine collaboration and networking opportunities in well- defined settings
RLO2 Innovation	Recognise and describe value propositions combining curiosity and creativity
RLO3 Professional Development	Show the value of managing your own learning and of planning your personal and professional development
RLO4 Decision-making	Explain different ideas, including your own, as part of decision making
RLO5 Communication	Communicate appropriately for your audience and purpose in multicultural and/or international settings
RLO6 Digital Data and Tools	Choose appropriate digital tools and data to present your ideas in familiar and well-defined contexts
RLO 7 Discipline Knowledge	Explain pre-defined theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Use a limited-range of established discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Describe perspectives from a range of disciplines in well- defined scenarios
RLO10 Human and Environmental Impact	Demonstrate the impact of human activity on people and on the environment.
LEVEL 4 OUTCOMES	
RLO1 Collaboration	Explore collaboration and networking opportunities to generate ideas for given situations
RLO2 Innovation	Define and compare value propositions, combining curiosity and creativity
RLO3 Professional Development	Identify opportunities for your learning and your personal and professional development
RLO4 Decision-making	Investigate and contrast different ideas, including your own, to inform decision making
RLO5 Communication	Communicate your arguments/reasoning, orally and/or in writing in multicultural and/or international settings within familiar and well-defined contexts
RLO6 Digital Data and Tools	Use digital tools and data in familiar and well-defined contexts

RLO 7 Discipline Knowledge	Explain theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Use established discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Identify and contrast perspectives from different disciplines in given scenarios
RLO10 Human and Environmental Impact	Explore the impact of human activity on people and on the environment
LEVEL 5 OUTCOMES	
RLO1 Collaboration	Collaborate and use appropriate networks to solve challenges
RLO2 Innovation	Analyse and develop value propositions, combining curiosity and creativity
RLO3 Professional Development	Develop a plan for your professional development
RLO4 Decision-making	Analyse and reflect on different ideas, including your own, to inform decision making
RLO5 Communication	Communicate <i>effectively</i> both orally and/or in writing in multicultural and/or international settings within unfamiliar and well-defined contexts
RLO6 Digital Data and Tools	Analyse and use digital tools and data responsibly in unfamiliar, well-defined contexts
RLO 7 Discipline Knowledge	Examine and apply theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Employ discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Investigate and apply perspectives from different disciplines in multifaceted scenarios
RLO10 Human and Environmental Impact	Analyse the impact of human activity on people and on the environment
LEVEL 6 OUTCOMES	
RLO1 Collaboration	Collaborate and build networks to solve challenges in complex settings
RLO2 Innovation	create and implement value propositions, combining intellectual curiosity and creativity

RLO3 Professional Development	Articulate a plan which encompasses opportunities for your professional development
RLO4 Decision-making	Formulate informed decisions using critical and reflexive thinking
RLO5 Communication	Communicate <i>effectively</i> both orally and in writing in multicultural and/or international settings
RLO6 Digital Data and Tools	Appraise and utilise digital tools and data in your professional and social contexts
RLO 7 Discipline Knowledge	Critique and synthesise theories, concepts and facts in your field of study relevant to the task
RLO8 Discipline Skills	Combine and employ a wide range of discipline-specific knowledge, techniques and tools for practical purposes
RLO 9 Interdisciplinary Perspectives	Integrate perspectives from different disciplines in multifaceted scenarios
RLO10 Human and Environmental Impact	Evaluate the impact of human activity, including your own, on people and on the environment

6. Learning and teaching strategy/ assessment methods (non-regulatory)

This is a guide to the academic opportunities available to help you achieve the overall aims and objectives of the course and the intended learning outcomes in Section 5. It is also a guide to the assessment methods used to test your achievement of the intended learning outcomes. In order to meet the full intended learning outcomes of the course, you will be expected to study independently, participate in class discussions, ask for support in academic skills if required and engage with your personal tutors.

The Regent's Learning, Teaching and Assessment Strategy (LTAS) outlines the vision of Regent's pedagogic and assessment approach. It strives to provide you with a well-connected, future facing, entrepreneurial, cosmopolitan and personalised education whereby you can achieve your full potential. It comprises of fourteen priority areas:

1. take a personalised approach to student learning: finding out about their previous learning and experience, offering individual guidance to help them plan their journey through university and beyond.
2. involve students in decisions about their learning, by giving them access to a dashboard of data on their progress, explaining our teaching methods and giving students increasing autonomy to create their own educational journey.
3. enhance student research, thinking and communication skills through their specialist subjects, in a culturally diverse, global context.
4. ensure that students have the knowledge and skills to bring more than one perspective to any challenge, both through their specialist studies and through specially designed, team-taught activities to prepare them for future impact in their chosen personal mission.

5. embrace a teaching approach where students collaborate with each other and with the tutors, and where diverse learning needs can be met.
6. provide learning activities which are active, often based on finding responses to real-world challenges; these activities will cross subject boundaries, and challenge orthodoxies by providing opportunities for students to explore alternative ways of thinking; they will allow students to take risks and have fun.
7. make use of flexible learning and novel on-campus space configurations to promote experimentation and discovery; and we will take learning outside the classroom, with London as an unparalleled resource.
8. provide students with tutors who are expert researchers or practitioners in their fields, who will facilitate learning, and who are engaged in continuous professional development both as teachers and in their specialist fields.
9. embrace the potential of digital technologies in supporting learning.
10. enhance students' global network and intercultural communication skills, through engagement with our international partnerships and offering tuition in many different languages.
11. base assessments on real-world tasks, projects and challenges, relevant to the future.
12. help students develop the capacity to evaluate their own work and learning, through in class activities (in self-assessment, student-to-student assessment and academic integrity).
13. provide feedback from different sources on student work, recognising what they do well and providing guidance to help learning and improve student work.
14. offer students an achievement portfolio where all their feedback is collated in one place, helping them to make sense of the feedback, and giving them something they can take with them when they leave Regent's to build evidence they can use for future employers.

Your course is premised on the Regent's Curriculum model which defines the structural design of our Undergraduate degrees and allows us to deliver the above learning & teaching priorities. Your course provides you with in depth knowledge and skills in your field through specialised subject cores whilst at the same time it exposes you to multi-disciplinary breadth through a range of future facing special electives and language options. Additionally, it develops your professional capabilities thorough an integrated approach to Industry and Entrepreneurship; at each level you will take modules that enable you to explore the world of work and engage you with real work challenges.

Your course therefore actively encourages you to connect all areas of your learning and build your customised, coherent high-impact learning narrative in the pursue of a personal and professional mission.

The Regent's Graduate Attributes express our educational purpose and identity which is to ensure that Regent's graduates are:

- Collaborative and networked
- Creative and entrepreneurial
- Critical and Reflective
- Culturally and socially versatile
- Digitally agile
- Well-informed, skilled and fluent across disciplines
- Responsible and environmentally conscious

To realise this purpose, we have articulated these Attributes into a set of ten observable and measurable university wide learning outcomes, The Regent's Learning Outcomes (RLOs). They were designed using national references to ensure that they are appropriated for the award of a UK degree and that your achievement is monitored against those national references. Teaching and assessments are designed accordingly to enable you to demonstrate that you have adequately met these outcomes.

The teaching and learning methods employed on the degree are designed to communicate its ethos in which object-based study is central. To this end, modules include regular visits on which you will examine works at first hand, both in public display settings as well as in privately organised handling sessions and study rooms. You will examine the modes of curation in public displays as well as the institutional spaces in which art is encountered and consumed. You will consider the experience of the viewer alongside the critical reception of and historic scholarship on the work. In this way, you engage with works of art directly, at first hand, as well as via the framing methods that play various parts in how these works are perceived and valued. Thus, our teaching and learning methods are shaped by theoretical discourses generated by social and feminist art history in particular, as well as semiotics and wider postmodern methods of engagement with works of art.

Breakdown of teaching methods by percentage per level

The following breakdown is a guide to how much time you will spend doing each teaching and learning method. The exact amount of time spent in taught/practical lessons or self-study will depend on the elective modules that you take.

- 'Taught' learning typically refers to timetabled sessions led by a member of academic staff, such as workshops, seminars, masterclasses, lectures and tutorials.
- 'Practical' sessions are also timetabled and led by an academic member of staff but are focused on practical work such as studio and laboratory work, field work undertaken at an external site and external visits.
- 'Self-Study' is time dedicated to self-directed learning that is guided by your own requirements to further your studies and complete assignments. This could include preparation for class, background reading, research and preparation for assessments, and writing.

Level 3		Level 4		Level 5		Level 6	
Taught	32%	Taught	16%	Taught	16%	Taught	16%

Course management and teaching staff

The course is managed by the Director of Content and the Course Leader. Your tutors are educated to masters or doctoral level and have relevant industry experience in museums and galleries. They have authored a number of books as well as articles published both in the national press and in academic journals. They regularly speak at academic conferences as well as public events. They have curating experience in small venues as well as major public institutions. In addition, most of our tutors hold a Fellowship of Advance Higher Education (Advance HE) from Fellow to Principal Fellow level. Your tutors are highly experienced in teaching. New tutors are supported in taking the Postgraduate Certificate in Higher Education.

You will be allocated a personal tutor, who will meet you on a one-to-one basis at various stages throughout the academic year and give you guidance and advice to support your ongoing personal and professional development throughout your studies at Regent's University London.

Assessment strategy and methods

Assessment is a positive element of your education. We are committed to delivering authentic assessment and challenge-led learning. This ambition is reflected in our new [Assessment Framework](#) where we outline the practices and expectations which will guide and enhance assessment, one of those practices being to move away from unseen written examinations as an assessment methodology and moving towards more authentic challenges. We're in the business of nurturing future leaders who can use what they've learnt to shape the world; authentic assessment and real-world challenges create a safe lab for that learning.

Assessment can be a learning tool and a guide to **understand and evaluate** the quality of your work and your progress. Your course will offer a variety of assessment methods that support the learning required by the learning outcomes. We will provide you with feedback on your assessment's performance to guide your learning journey. You will play an essential part in our assessment strategy as an active feedback recipient, and we will work together to determine how you can progress further from the feedback received.

There are some differences in the purposes of the assessment you will encounter: some assessments are formative and others are summative.

Formative assessments will provide you with an opportunity to receive feedback on the progress of your work through the completion of an assessment or assessment tasks. These are developmental in nature as they offer information to help you identify next steps in learning and how to do better in future work which is why no grades are given. Formative assessments feed directly into summative assessments. All assessment tasks include formative assessment opportunities.

Summative assessment is the evaluation of your learning at a particular time, measured against specified learning outcomes. You will be awarded a grade and numerical mark for each summative assessment on each module. The grades you receive for assessed work on each module are added up to give a final grade for the module. Assessment also determines your suitability to progress onto the next year of your course and, at the end of the course, it enables the University to determine your degree award.

All assessments will incorporate effective and constructive feedback that relates to the module-specific or task-specific marking criteria previously made available in the assessment briefs. Feedback for summative assessment will explain the reason for the mark given but it can also provide information about how to improve the work for future assessment tasks.

The table below lists possible ways your tutors will facilitate the delivery of feedback on your formative assessments:

Forms of Assessment	Ways to deliver feedback on formative assessments
Written Assignments (various types)	Feedback on draft submitted on blackboard by a specified date

	Feedback initiated through peer to peer reviews during workshop activity
	Verbal feedback (face to face or recorded), where student makes a record of key points and shares with the tutor
Presentation	Presenting a practice run in class, receiving feedback from peers and/or tutor
	Formative feedback on recordings of presentation practice submitted on Blackboard by a specified date.
	Feedback on students' own assessment on the recorded practice presentation (both submitted on Blackboard by a specified date)
Creative Work	Feedback from tutors/peers through an exhibiting event. Students make a record of key points and shares with the tutor
	Feedback on student's own assessment of their work
	Verbal feedback (face to face or recorded), where student makes a record of key points and shares with the tutor

You will receive feedback in an orderly and timely fashion (approximately 3 weeks from the submission date). We will notify you of the feedback release day in your assessment briefs.

Assessments on the BA Art History require you to think critically and creatively across the knowledge that you have acquired. Subject-specific knowledge and understanding are matched by skills and abilities (visual and critical, and historical), while you will equally develop transferable skills (cognitive and research skills, open-mindedness, communication skills, teamwork, diligence, autonomy, time management and personal initiative). Modules are assessed using a range of methods including written essays, journals and reports, blogs, individual and group presentations and oral examinations in which you discuss topics that you have explored in the module. All of the assessments are designed to help you develop skills that you will need in your future career. You will be able to approach unfamiliar art with confidence and you will have the capacity to carry out independent research. Equally, you will have developed inter-personal skills, in order to conduct teamwork effectively.

If you are on a support agreement (SSA) you may be offered alternative assessments in accordance with the Guidelines of the University's Disability Guidelines for Alternative Forms of Assessment.

Study Abroad credits

The course includes the opportunity to undertake a term of study abroad at one of our international partner institutions in the second term of Year 2 (Level 5). You must apply and confirm your Study Abroad option by the end of first term of Year 1 (Level 4). The curriculum and credits in the partner institution will be mapped to your modules as

required by the course. Your Study Abroad application and learning agreement will be subject to the discretion and approval of your Director of Content or Course Leader. All grades received at an international partner university will be converted to an equivalent Regent's University London grade, in accordance with the institutional grading scale and grade conversion table. The average grade will represent 50% of the overall mark associated with Level 5.

If you choose the 20-credit "Work Placement" module in the Spring Term of Level 5, you will be assessed according to the assessment methods specified in the equivalent module specification.

Ethical approval of research

All research and other academic activities conducted within and outside the University by students at Regent's University London should comply with Regent's ethics policies and process prior to its commencement. This will include, but is not limited to, all academic work involving human or other living participants, all industry live projects and all experiments, investigations and procedures involving human or other living participants, or data relating to such living entities.

7. Relationship to other courses

Some courses share modules or have other connections to other courses. This is a guide to whether this is applicable for your course.

At the foundation level (level 3), there are eight shared modules that are common to all integrated courses.

The Level 4 Learning Perspectives, the Regent's Special Electives, the Language electives and the Level 5 Industry and Entrepreneurship modules are offered on all Undergraduate courses, in addition to the Subject Core modules for individual courses.

8. Student support

We want you to make the most of your time at Regent's and we also know that sometimes life at university can be hard. We can give you the support that you need on academic study, language skills, careers, disabilities, mental health, gender, sexuality, finance and many other issues.

Regent's Student Hub will be the first port of call for the majority of your needs. Staff in the Hub can either deal with your enquiry directly or point you to one of our services for more help.

Our support services include:

- Personal tutor scheme
- Student Services

- Academic Skills
- English for Academic Purposes
- Careers advice, including placements
- Disability support
- Accommodation
- Student Union

For more information about life at Regent's and the services we offer, visit:

regents.ac.uk/information/student-life/for-current-students

9. Learning support

Regent's offers a variety of different facilities and technologies to support your studies. These include seminar rooms, lecture theatres, collaborative workspaces, the Library, IT labs and specialist software.

If you require support or advice with regard to accessing campus facilities, please speak to our disability support officer so we may address your concerns.

regents.ac.uk/information/student-life/for-current-students/disability-information

The Library at Regent's supports teaching and learning at the University. Our relevant and extensive collections, flexible study spaces and knowledgeable staff can help you achieve your academic goals. During term time, the Library is open until late in the evenings. During busy exam periods, it is open 24/7. Most areas are fully accessible to people with disabilities and wherever there are challenges we work with individual(s) to overcome, rearrange or support to facilitate good and safe access.

Regent's uses Blackboard as its virtual learning environment (VLE), where you will find learning materials and content for your modules. You will also submit your coursework online and receive feedback through Blackboard.

To support your studies and time at Regent's, there is a free mobile app which can be downloaded from the Apple or Android stores which will provide information about the University, the campus and your studies.

Regent's has IT labs where you can use our computers and there are dedicated areas for you to use your own laptops and tablets. The campus has free Wi-Fi, including most areas of our extensive gardens, so any area can be adapted into a student study space.

Regent's is a member of the Eduroam network, so you can connect to this service to access Wi-Fi worldwide.

For more about Regent's learning resources, visit:

regents.ac.uk/about/learning-resources

10. Opportunities for personal development planning

You will have many opportunities to plan your own personal development. You can select which Special Electives you study alongside the core Art History modules and whether you

wish to learn a modern language. In the spring term of the second year, you can choose whether or not to study abroad and between a placement or taking on an enterprise or industry challenge. You will have choices on what form your Major Project will take in the final year, whether you develop an enterprise project, curate an exhibition or explore in depth an academic topic that you are passionate about.

Extracurricular activities

You will also have the opportunity to engage with extracurricular activities on and off campus organised by staff from across Regent's. These include but are not limited to prominent guest speakers' presentations, conferences, competitions, university societies, Student Union membership and student representation. Participation in competitions or engagement with societies and Student Union are a great way to develop a host of skills and evidence demonstrating your diverse capabilities and can contribute to fruitful personal development planning. Our students have launched online journals and participated in student conferences during their degree course.

Careers, Enterprise and Industry

The Careers, Enterprise and Industry team supports students' individual career aspirations through a personalised approach. We partner with students to help them to acquire attributes, tools and skills to be able to make informed decisions and manage their entire career.

Handshake – jobs, employers, events and resources

We've partnered with Handshake – our careers platform – to offer you:

- Careers and enterprise resources – giving you all the information you need to succeed
- Local and international jobs, internships, and placement opportunities
- Networking opportunities with companies of all sizes, as well as start-ups
- Careers and enterprise events and workshops
- The chance to create and build your own profile to personalise the type of content you see, the employers you engage with, and the types of job opportunities highlighted to you.

Placements and internships

Students looking to undertake a placement or internship as part of their studies can receive support in developing their application, as well as advice and guidance when sourcing suitable placement and internship opportunities.

We also offer similar support for students who wish to enhance their learning by undertaking an internship during the summer period.

Careers appointments and drop-in sessions

Students can book an appointment with a career consultant to discuss anything career-related or book some career coaching sessions as a student and/or after they graduate. They are encouraged to engage with the careers team as early as possible in their study. It can take time to gather an array of career management skills, and to be empowered to explore options and plan their next steps.

Careers appointments are booked on Handshake and are either virtual on Handshake or in-person. Appointment types include, but are not limited to, career conversations, entrepreneurship and enterprise, career coaching, placements and Internships, applications feedback, and interview preparation.

The Careers, Enterprise and Industry team has an open-door policy. Students can drop in anytime during business hours to ask a quick question about anything careers, enterprise, or industry related.

Enterprise and entrepreneurship

Regent's is excited to provide a comprehensive, entrepreneurial offer for students and graduates. This flagship initiative is known as **The Founder's Programme** – a hands-on programme to support students and graduates interested in starting their own enterprise, with tailored guidance, access to live sessions with in-house consultants and guest speakers, mentoring, coaching and experiential bootcamps.

The programme is a dynamic, immersive learning experience where students will build the foundations of their start-up with a global team and get a chance to pitch to investors at the end of the programme – allowing you to network and connect with peers, alumni, industry leaders and start-up founders.

Co-working spaces

Regent's also offers a dedicated co-working space available on campus with an opportunity to work on your business idea while collaborating and sharing ideas with peers. We also have a strong network of partnerships with some of the most noted co-working spaces in the country.

11. Admissions Information

Details of the University's entry requirements can be found at: [Entry Requirements](#)

12. Visas and immigration

At Regent's, you will be part of a truly international community, with the opportunity to make friends and contacts from around the world.

If you require a visa to study in the UK, please visit the Visas and Immigration page on the website: regents.ac.uk/study/international-students/visas-and-immigration

13. Assessment and progression regulations

You will be assessed on how well you are achieving the intended learning outcomes at different stages throughout your time of study at Regent's

In order to continue with your studies, there are minimum requirements to be met in order to progress to the next level of your course. The current progression regulations are published within the Academic Regulations on our website and via the link below. These are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you:

regents.ac.uk/about/governance/academic-governance/academic-regulations

You will be provided with guidelines on what you need to achieve in each assessment to ensure you receive a good mark. A generic description of each grade is provided in the Regent's [Common Assessment Scale](#).

14. Award criteria

To complete your course, you will need to achieve 360 credits for an undergraduate degree.

You must also meet the requirements of any specific regulations as stated under the Assessment and progression regulations section.

For further details on award requirements, please see the Academic Regulations, available at on our website at the link below. The regulations are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you: regents.ac.uk/about/governance/academic-governance/academic-regulations

15. Methods for evaluating and improving the quality and standards of teaching and learning

All quality assurance policies and procedures are found in the University Academic Regulations. The current versions are available at the link below. The regulations are subject to review and amendment each year. We will let you know if there are any major changes to the regulations that may affect you: regents.ac.uk/about/governance/academic-governance/academic-regulations

Regent's University London operates a number of institutional processes for ensuring and enhancing its academic quality standards. These include: course (re)validations, course modifications, course monitoring, student feedback systems and external examining.

Course (re)validations

The University has a formal process to approve a new course or reapprove an existing course of study. This involves a panel of academics from within and outside Regent's to ensure that your course is of appropriate academic standard and of a high quality.

Course modifications

We listen to your feedback and make changes to your course as appropriate. You will be consulted on any significant changes to your course which may affect the outcomes of your study. All changes to courses or modules are subject to approval through Regent's academic governance structures.

Course monitoring

In order to ensure courses, continue to meet their academic and professional aims and objectives, Directors of Content/Course Leaders are required to prepare an annual monitoring report (AMR). The reports include module feedback as well as external examiner reports and responses. They are reviewed at faculty and institutional level.

Student feedback systems

Students play a key role in the University's processes for enhancing the quality of its educational provision and broader student experience. There are multiple ways for you to provide feedback on your experiences at module level (e.g. through questionnaires), course level, through student representatives and at course committees. Final-year Undergraduate students (Level 6) are invited to take part in the National Student Survey (NSS).

External examiner reports

External examiners ensure that Regent's standards and quality processes are appropriate and are of a standard comparable to those of other higher education institutions. There are two types of external examiners. One reviews subject level assessment and the other reviews institutional level processes and attends the progression and finalist boards.

An annual external examiner report is produced at the end of every academic year at levels 5, 6 and 7. These are made available to students through the AMRs.

16. Curriculum map

This table indicates which study units assume responsibility for delivering the learning outcomes detailed in section 5.

	Module	LO1	LO2	LO3	LO4	LO5	LO6	LO7	LO8	LO9	LO10
